

Amendments to the Specification

Please replace the paragraph at Page 10, Line 22 of the specification with the following rewritten version:

In this embodiment, the protrusion 73 of the reflector 70 may have a diameter smaller than a pitch of the prism teeth 10a of the light guide plate 10. That is, the diameter " $\#d$ " (see FIG. 4) of the elastic protrusion 73 is smaller than the pitch "t" (see FIG. 4) of the prism teeth 10a of the light guide plate 10, thereby decreasing deformation of the prism teeth 10a due to the protrusion 73.
